**Subject:** Deadline question from Durango TV News

Libby:

Can you provide more details with regard to how you're getting water to families who need it for livestock, etc.? And what is the protocol for testing wells?

Do we have a number for the households that may have at-risk wells in La Plata County? San Juan County published a list. What about La Plata County?

Thanks. If it's easier, please call me a 970-769-0287.

Deborah
